Professional Summary

Full-stack JavaScript Developer with 2 years of professional experience in ReactJS, NodeJS, and VueJS. Recently enhanced skills through IBM certifications and personal projects. Passionate about building user-focused technology solutions.

Technical Skills

- **Front-end:** ReactJS, NextJS, VueJS, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, Tailwind CSS

- **Back-end:** NodeJS, Express, REST APIs, Authentication Systems

- **Databases:** PostgreSQL, MySQL, MongoDB, SQL

- **Tools & Platforms:** Jest, Git, Vite, Axios, Fetch, Jira, Storybook, Agile Scrum Methodology

Professional Experience

Software Engineer   Aug 2022 – Aug 2023
Stratpoint Technologies (ReactJS, NodeJS, Typescript)
- Enhanced overall system security and mitigated potential risks by resolving security issues identified through VAPT (Vulnerability Assessment and Penetration Testing)
- Developed full-stack features for project management system serving development teams with Jira-like functionality
- Ensured optimal performance and code quality by identifying and resolving defects through comprehensive test case development
- Collaborated with designers, project managers, and engineers in technical discussions to address both front-end and back-end requirements
- Built robust REST APIs and back-end services using NodeJS for improved system performance

Software Engineer Intern   Apr 2022 – Aug 2022
SwapooLabs (ReactJS, Python)
- Completed intensive full-stack development training program in ReactJS, NodeJS, and Python
- Worked alongside senior employees refactoring authentication features, leading to more maintainable codebase
- Developed user authentication flows, session management, and cross-platform integration features
- Implemented new UI design and built reusable UI components, integrating them with Storybook for faster development cycles

Front End Developer   Apr 2021 – Sep 2021
Konganbuddies Marketing Inc. (VueJS, Typescript)
- Optimized performance of existing products by modernizing and maintaining code while cooperating with back-end developers
- Increased user engagement and reduced issues by collaborating with UI designer to redesign entire main web application
- Implemented responsive design principles ensuring optimal user experience across devices
- Generated more user participation by creating responsive affiliate web application with focus on user experience

Professional Development & Projects | 2023-2025

Continuous Learning
- IBM Web Development Fundamentals
- IBM Front-End Web Development
- IBM Back-End Web Development
- IBM Responsive Web Page Development
- IBM Interactive Front-End Interface Development
- IBM Integration of Databases
- IBM Web Application Testing and Deployment

Technical Projects
- **Real-time Communication App** (ReactJS, NodeJS, WebSocket)
  Full-stack messaging platform with email, live chat, SMS, and MMS functionality developed for technical assessment

- **Stock Market Quick Search** (ReactJS, Financial APIs)
  Real-time stock data visualization using Finnhub API

- **Multi-App Platform Suite** (SolidJS, NodeJS)
  Currently developing timer application with planned expansion to other productivity tools

Certificates

- IBM SkillsBuild Software Engineering for Web Developers Certificate (In Progress)

- IBM SkillsBuild Career Management Essentials (Completed 2025)

- Coursera ReactJS, NodeJS, and Python Course (Completed 2022)

- The Odin Project Full Stack Curriculum (Completed 2021)

Education

Bachelor of Science in Information Technology   2019 – 2021
STI College
